## WORK EXPERIENCE

### Hypernode (part of team.blue, formerly TransIP Group)

Amsterdam, The Netherlands

*Senior Full Stack Engineer*

*Jan. 2020 – Present*

- Led the full-stack architecture of the platform's control panel (Python and Django), guiding the team on APIs and frontend implementation (VueJS) including analytics, SSH/FTP key management, permissions, automated domain/SSL certificate provisioning and checkout flows.
- Architected automated PHP LTS security patch agent and billing infrastructure, deployed across 4,000+ servers.
- Engineered a scalable multi-currency framework across our APIs and ordering systems, moving away from hardcoded currency to support dynamic localized currencies for international markets.
- Designed and built a centralized platform alerting system, enabling asynchronous event-driven notifications across multiple channels, including Slack webhooks and automated emails, to improve incident response times.
- Mentored and onboarded new developers through hands-on technical sessions, and spoke at international conferences like MeetMagento UK and eCommerce Expo to share our platform engineering insights.
- Served on weekly on-call infrastructure rotations, providing reliable system support, incident response, and performance debugging for over 30,000 production servers.

### Fabrique

Amsterdam, The Netherlands

*Full Stack Engineer*

*Oct. 2016 – Dec. 2019*

- Developed custom full-stack web applications built on top of the Wagtail (Python/Django) framework, delivering highly interactive features with VueJS for high-end client designs.
- Gathered technical requirements directly from clients to scope and build custom features, then ran live demos and software training for delivery.

### Zapaday (Acquired by ANP / now ANP Agenda)

Amsterdam, The Netherlands

*Head of Development*

*Oct. 2014 – Sep. 2016*

- Managed code quality, architectural direction, and sprint delivery for a team of 6 engineers and designers, successfully scaling the core agenda platform.
- Successfully prepared and guided the platform's infrastructure and development workflows through a rigorous ISAE 3402 Security Audit certification.

*Full Stack Engineer*

*Feb. 2012 – Oct. 2014*

- Developed core full-stack features for the internal news and event agenda web application using PHP and CodeIgniter.
- Built robust web crawlers to discover, parse, and index data streams into a centralized production database.

### Sigma Alimentos

Monterrey, Mexico

*.NET Developer Intern*

*June 2011 – Feb. 2012*

- Built and deployed internal .NET web applications to automate core Human Resources workflows.

### ViaTecla

Lisbon, Portugal

*Software Engineer Intern*

*May 2010 – May 2011*

- Developed dynamic web applications using C# and the .NET framework, integrating them with an in-house CMS.

## EDUCATION

### ITESM Tecnológico de Monterrey

Monterrey, Mexico

*BS Computer Science and Technology*

*2006 – 2011*

## TECHNICAL SKILLS

**Languages:** Python, JavaScript/TypeScript, SQL

**Frameworks & Libraries:** Django, Node.js, VueJS, ReactJS

**Tools & Infrastructure:** Docker, GitHub Actions, Jenkins, Ansible, MongoDB, Elasticsearch, Vite/Webpack

**Methodologies & Compliance:** TDD, CI/CD, Clean Code, Agile/Scrum, Security Audits (ISAE 3402)

## ACTIVITIES & INTERESTS

Toastmasters (active member and former board member), Fitness (swimming, gym), Volunteering (Canal Pride boat organization, LoveSwim competition support, swim club welcoming committee)
